M.A. Ed. Urban Environmental Education

Antioch University
Seattle

Leaders - Mentors - Role Models

Understand community culture & needs

Generate collective impact

Collaborate from inside out

Multiple perspectives

Build community capacity

Leads to resiliency in stressed systems

A cadre of diverse leaders

A passion for equity & urban innovation

Economic

The issue

Education

Business

Urban planning & design

Human services

Technology
Driving Questions

- What is the **work that needs to be done** in urban communities to ensure human and environmental wellbeing?

- What are the **urban realities** that will influence the education of communities in order to build capacity to address environmental, social, and cultural issues?

- How will education (and prepared educators) **build the capacity** for collective impact, community resilience, environmental quality and sustainability?

- How can we change create an inclusive future?
