“This is exactly the information I need to dig deeper into understanding how my choices and actions as a landscape manager affect soil and plant health.”

“Your class has motivated me to document what I have been doing, [for example,] using mulch to compost weeds – I will also be using the worksheet you provided for future projects.”

“I am an urban IPM professional with great interest in soil restoration - Organizing this knowledge in a restoration context was extremely useful for me.”

“Science based evidence for using soil amendments and mulch for restoration in real, practical applications is very helpful. Thank you again.”
