EMERALD SHORES

SpeakThunder Berry, Puyallup, Nakota, Warm Springs

This year's program aims to bridge the gap between tribal practices and local government, fostering the kinds of partnerships that can interweave community, access, ancestral stewardship, and current management practices that all work towards collaborative stewardship of our urban forests. Weaving together stories, science, and heritage knowledge, we aim to ensure the inclusion of tribal perspectives in urban forestry practices. We hope to see you there!
